

# Quick Start Guide

1

Mount your e-gleek device according to the given instruction

2

Press the TEST button twice (1 sec. interval) and wait for the LED to stabilize

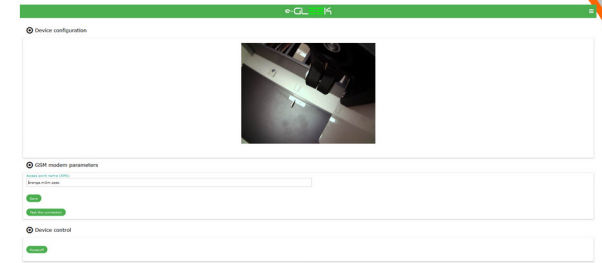

Press the upper button and select "sleep mode" (Red led) "Active mode" (Green LED).

3

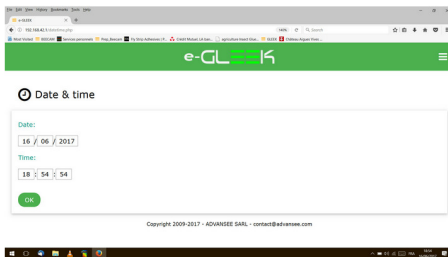

Connect your smartphone or any Wifi capable device to the e-gleek Wifi HotSpot

4

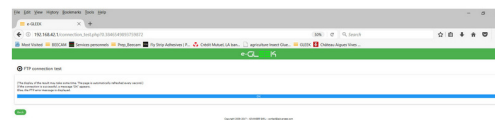

Configure your device using one internet explorer (IP address: 192.168.42.1)

5

Check if Date and Time are correct. Change if necessary

6

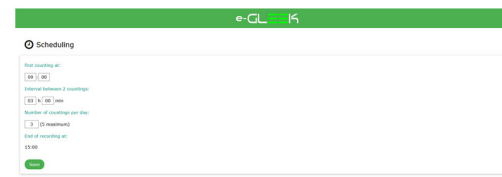

Test the connection to the 3D network

<sup>(1)</sup>SSID: e-gleek123  
password: tgv44air!

The actual name can be found on the sticker on the side of the grey box

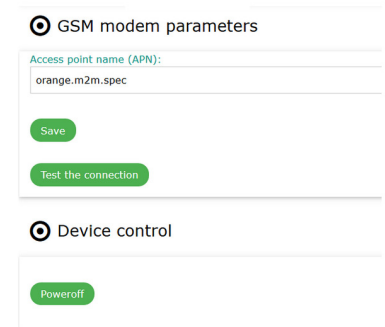

Before using the camera, read the user's manual !

7

Check the insect counting schedule

8

Turn the device OFF
